Federal Milk Order Market Statistics for September 1983

Highlights

- Minimum Class I Price, \$14.84; Blend, \$13.67
- Producer Deliveries Up 3.7 Percent
- Producer Milk Used in Class I Up 3.0 Percent
- 47 Percent of Deliveries Used in Class I
- In-Area Fluid Sales (Adjusted) Up 1.6 Percent

Special This Issue

Adjusting "In-Area" Fluid Milk Sales for Calendar Composition

TABLE OF CONTENTS

		Page No.
Summary		4
Milk mark	eting area map	8
Table 1:	Federal order fluid (Class I) differentials, October 1983 and minimum Federal order Class I prices, October and November 1983 and 1982	9
Table 2:	Federal milk order class and blend prices and butterfat differentials, September with comparisons	10
Table 3:	Average Federal milk order Class I and blend prices, by marketing area, January-September, with comparisons	12
Table 4:	Number of producers delivering milk to handlers regulated under Federal orders, total producer deliveries, butterfat content of producer deliveries, and average daily delivery per producer, by marketing area, September	14
Table 5:	Producer deliveries of milk used in Class I, Class I utilization, and gross Class I use by handlers regulated under Federal orders, by marketing area, September with comparisons	16
Table 6:	Producer deliveries of milk used in Class II and Class II utilization for handlers regulated under Federal orders by marketing area, September and year to date	18
Table 7:	Total producer deliveries of milk and producer deliveries used in Class I by handlers regulated under Federal orders, by marketing area, January-September with comparisons	20
Table 8:	Whole milk and lowfat and skim milk items sold in marketing areas defined by Federal milk orders, for markets where such information is available, August 1983, with comparisons	22
Table 9:	Packaged sales of individual whole milk products, and lowfat and skim milk products, in 44 selected marketing areas defined by Federal milk orders, January 1983 to date, with comparisons	25
Table 10:	Packaged sales of whole milk items, lowfat and skim milk items, milk and cream mixtures, cream items, and total fluid items by handlers regulated under Federal milk orders, grouped by region, August 1983, with comparisons	27
Table 11:	Packaged sales of milk and cream mixtures, cream products, yogurt, and eggnog by handlers regulated under Federal milk orders, January 1983 to date, with comparisons	28
Table 12:	Milk, skim milk, and cream utilized in the manufacture of dairy products by handlers regulated under Federal milk orders, grouped by region, August 1982	30
Table 13:	Milk, skim milk, and cream utilized in the manufacture of dairy products by handlers regulated under Federal milk orders, grouped by region, August 1983	31

	Page No.
Table 14: Percentage of whole milk equivalent used in the production of manufactured dairy products, in Federal order markets, January 1983 to date, with comparisons	32
Table 15: Federal order base and excess prices in various marketing areas, September with comparisons	33
Table 16: Federal milk order seasonal incentive payment plans in various marketing areas, September, with comparisons	33
Table 17: Factors used in the computation of tentative Class II prices in Federal milk order markets, January 1983 to date	34
Table 18: Dairy product prices and selected dairy farmer price measures, January 1983 to date, with comparisons	35
Table 19: United States milk prices, Minnesota-Wisconsin price series, and butter-powder "snubber" prices, January 1983 to date, with comparisons	36
Table 20: United States general price measures, January 1983 to date, with comparisons	37
Table 21: Consumer price index for all urban consumers: Selected products, United States city average, January 1983 to date, with comparisons	38
Table 22: U.S.D.A. purchases (delivery basis), January 1983 to date, with comparisons	38
Table 23: U.S. production, milk and selected manufactured dairy products, by months, 1982 and 1983	39
Table 24: Commercial and government storage holdings, by months, 1982 and 1983	39
Table 25: Average retail food prices for selected products, United States city average, and four regions, January 1983 to date	40

1/ Represents changes over the previous year. Percentages computed from unrounded numbers. Data for 1980 adjusted to a 365-day basis before computing percent changes.

2/ Based on comparable markets--orders which were effective entire period, 1982-83, and which have had no significant marketing area changes; excludes Alabama-West Florida.

3/ Average or total. May not add due to rounding.

1/ Total packaged disposition, in and out of the marketing area, by regulated handlers. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources.

2/ Plain and flavored whole milk.

3/ Plain, solids added, and flavored lowfat and skim milk, and buttermilk.

4/ Light, heavy, and sour cream, and cream dips.

5/ Includes eggnog and yogurt.

5/ Includes eggnog and yogurt.

6/ Represents changes over the previous year. Percentages are based on the same number of markets in both years. Data for 1980 adjusted to a 365-day basis before computing percent changes.

7/ Represents the data for all Federal milk order markets, except for New York-New Jersey and Alabama-West Florida.

l/ Includes producer milk and some other source milk used to produce manufactured dairy products in regulated pool plants as well as milk diverted and shipped to nonorder plants for processing. Some data are partially estimated.

2/ Includes, in addition to listed manufactured products, milk, skim milk, and cream used in other manufactured products: i.e., evaporated milk; condensed milk; whole milk powder; aerated, frozen, and plastic cream; milk, skim milk, and cream used in food products as well as used in animal feed; dumped or spilled; plant loss; and unidentified.

3/ Represents changes over the previous year. Percentages are based on the same number of markets in both years. These changes are based on pounds of skim milk. Data for 1980 adjusted to a 365-day basis before

computing percent changes.

4/ Excludes New York-New Jersey and Alabama-West Florida.

1/ In-area sales represent total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under The orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.

2/ Plain and flavored whole milk.

3/ Plain, solids added, flavored lowfat and skim milk, and buttermilk.

4/ Represents changes over the previous year. Percentages are based on the same number of comparable markets in both years. Data for

1980 are adjusted to a 365-day basis before computing percent changes. 5/ Adjusted to eliminate variations in data due to calendar composition and seasonality. See special article in this issue beginning on page 42.

6/ Excludes New York-New Jersey and Alabama-West Florida. Uata for the current month are estimated.

1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the mrketing area. See footnotes on page 24 for location at which price is reported. All averages are weighted.
2/ Data for 1982 are for May through September only.
3/ Based on markets where orders were effective entire period, 1982-83, and which had no significant marketing area changes; excludes Alabama-West Florida.
4/ The data for 1982 are weighted averages of the data for the four merged markets. See "Major Order Actions" in FMOS-277.
5/ Excludes Black Hills and Fort Smith for which the data were restricted.

The data for Eastern South Dakota and Black Hills have been combined in order to mask restricted data. The data for Central Arkansas and Fort Smith have been combined in order to mask the data for Fort Smith which were restricted. The data for 1982 are the summation of the data for the four merged markets. See "Major Order Actions" in FMOS-277. 1/8 Based on markets where orders were effective entire period, 1982-83, and which had no significant marketing area changes; excludes Alabama-West Florida. $\frac{2}{1}$ The data for Eastern South Dakota and Black Hills have been combined in order to mask restricted data. $\frac{3}{1}$ The data for Central Arkansas and Fort Smith have been combined in order to mask the data for Fort Smith which were restricted data for 1982 are the summation of the data for the four merged markets. See "Major Order Actions" in FMOS-277.

l/ Excludes Southeastern Florida; Class III only applies to the skim milk portion of all milk disposed of for fertilizer or livestock feed or dumped. Also excludes Lake Mead for which the data were restricted. Otherwise, all orders which have three classes of utilization are shown.

2/ Data for 1982 are for May through September only.

3/ The data for Central Arkansas and Fort Smith have been combined in order to mask the data for Fort Smith which were restricted.

4/ The data for 1982 are the summation of the data for the four merged markets. See "Major Order Actions" in FMOS-277.

5/ As a result of an amendment to the classification provision for Class II milk, the data for 1983 are not comparable to 1982.

6/ The data for 1982 were restricted.

```
FOOTNOTES FOR TABLE 2.
  1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the marketing
area. All averages are weighted.
  2/ For those markets which have base-excess plans (see table 14) the prices represent a
weighted average of the base and excess prices.
  3/ Zone 1 (Boston). Prices at 201-210 mile zone: Class I and blend are 72 cents less.
Class I price at Hartford is 10 cents less.
  4/ New York metropolitan area. Price at 201-210 mile zone: Class I and blend, 59 cents less.
Class II, 8 cents less.
5/ Philadelphia, Baltimore, and Washington, D.C. Price excludes a 6-cent direct delivery differential applicable to milk delivered to Philadelphia.
  6/ See table 15 for deduction for advertising and promotion.
  7/ Atlanta.
  8/ Zone 2 (Birmingham).
  9/ Jacksonville and Tallahassee.
 10/ Miami.
 \overline{11}/ Applies to the skim milk portion of all milk which is either disposed of for fertilizer or
livestock feed or dumped.
12/ Based on markets where orders were effective entire period, 1982-83, and which had no
significant marketing area changes. Excludes Alabama-West Florida.
 13/ Zone 2 (Marquette).
T4/ Individual handler pool. Blend prices are weighted averages of all handlers.
15/ Zone 1 (Detroit). Price excludes direct delivery differential of 10 cents applicable to
milk delivered to Detroit.
16/ Zone 1 (Erie, Pa.). Class I and blend price for zone 3 (Cleveland) plus 8 cents, for zone 4
(Pittsburgh) plus 10 cents.
17/ Ten cents for advertising and promotion has been deducted from the blend price. 18/ Central zone (Cincinnati and Columbus).
19/ Indianapolis.
20/ Zone 1 (Chicago). Class I and blend price at Milwaukee (Zone 4) 9 cents less.
 21/ Peoria.
 22/ Base zone (Alton). Class I and blend price at Carbondale (Southeastern zone) 7 cents more.
 23/ Zone 1 (Minneapolis).
 24/ Sioux Falls.
\frac{25}{7} Zone 1 (Des Moines). Class I prices at other points in the marketing area: Rock Island, Ill., minus 7 cents; Waterloo, minus 16 cents.
 26/ Zone 1 (Omaha).
 27/ Kansas City and Topeka.
 28/ Zone 1 (St. Louis and Springfield).
 29/ Bristol, Chattanooga, and Knoxville.
 30/ Little Rock.
 31/ Zone 1 (Oklahoma City). Prices for 1982 are weighted averages of the prices for the four
merged markets. See "Major Order Actions" in FMOS-277.
 32/ Amarillo.
 33/ Zone 1 (Dallas). Class I price at Houston plus 36 cents.
 34/ Monroe and Shreveport.
35/ Zone 1 (New Orleans).
 36/ Denver.
 37/ Grand Junction.
 38/ Boise, Idaho.
 39/ Salt Lake City, Utah.
 40/ Las Vegas, Nev.
 41/ Phoenix.
42/ Albuquerque, Santa Fe, and El Paso. 43/ District 1 (Seattle).
 44/ Spokane, Washington.
 45/ Portland.
46/ Excludes Black Hills and Fort Smith; fewer than three handlers. Black Hills prices:
Class I 1983, $14.45 and 1982, $14.37; Blend 1983, $13.47 and 1982, $13.75; Class II 1983,
```

\$12.48. Producer differential 1983, 17.1¢, Class I differential, 1983, 17.7¢, and Class II differential, 1983, 16.6¢. Fort Smith prices: Class I 1983, \$14.45 and 1982, \$14.37; Blend 1983, \$14.31 and 1982, \$14.26; Class II 1983; \$12.63; Class III 1983, \$12.48. Producer differential 1983, 17.4¢.

47/ A weighted average price for milk in excess of Class I needs calculated as follows: (producer deliveries used in Class II times the Class II price) plus (producer deliveries used in Class III times the Class III price) divided by (total producer deliveries in excess of Class I needs) would be \$12.53.

^{1/} This pricing provision is currently in effect in 40 marketing areas. Three separate differentials and tentative prices are computed. For ease of presentation, the 40 marketing areas have been grouped as follows: Group A: Central Arizona, Central Arkansas, Central Illinois, Chicago Regional, Eastern Colorado, Eastern Ohio-Western Pennsylvania, Eastern South Dakota, Fort Smith, Georgia, Great Basin, Greater Kansas City, Greater Louisiana, Indiana, Iowa, Louisville-Lexington-Evansville, Lubbock-Plainview, Memphis, Nashville, Nebraska-Western Iowa, New Orleans-Mississippi, Ohio Valley, Paducah, Rio Grande Valley, St. Louis-Ozarks, Southern Illinois, Southwest Plains, Southwestern Idaho-Eastern Oregon, Tennessee Valley, Texas, Texas Panhandle, Upper Midwest, and Western Colorado. Group B: Lake Mead, Southeastern Florida, Southern Michigan, Tampa Bay, and Upper Florida. Group C: Inland Empire, Oregon-Washington, and Puget Sound.

^{2/} Price at 3.5 percent butterfat content for the second preceding month.

3/ Total weighted change in gross values of milk used to produce Cheddar cheese and butter/nonfat dry milk.

4/ As announced on the 15th of the preceding month. The final (effective) Class II price is announced on the 5th of the following month. See table 2 for the (effective) Class II price.

^{1/ &}quot;Consumer Prices: Energy and food," BLS, U.S. Department of Labor. Regions are defined
as the four census regions. According to BLS, average prices are best used to measure the
price level in a particular month, not to measure price change over time. To measure change
over time, the Consumer Price Index and its component indexes for individual items are more
appropriate. The average food prices included in this table reflect variations in brand,
quality, and size among geographic areas. BLS suggests that users of average food prices
should be aware that these differences exist.

^{2/} Prices are per 1/2 gallon.

^{3/} Prices are per pound for Grade AA, salted, stick butter. 4/ Prices are per 1/2 gallon for prepackaged, bulk, regular.

^{5/} Prices are per 1/2 pint for natural, fruit flavored.

ADJUSTING IN-AREA FLUID MILK SALES FOR CALENDAR COMPOSITION*

The trend in sales of fluid mills products is one of the more important statistics used to assess the current dairy situation. Tables 8 and 9 of this publication present sales of whole milk items, lowfat and skim milk items, and the total of these in marketing areas as geographically defined by each Federal milk order market. These sales figures reflect not only variation due to trend, but also variations due to seasonality, calendar composition, and randomness. The effect of seasonality is minimized by comparing monthly data for the current year with the same month of the previous year. Since the adjustment process described in this article removes most of the variation due to calendar composition, the adjusted sales data generated by this process can be used to measure trend.

Variation in sales data due to calendar composition results because the number of the types of days--Sundays, Mondays, etc.--that occur in a particular month vary from year to year. For example, in 1982, August had five Sundays, Mondays, and Tuesdays whereas in 1983, August had five Mondays, Tuesdays, and Wednesdays. In comparing the two months, 1982 had an extra Sunday and 1983 had an extra Wednesday. Since there is daily variation in fluid milk sales data, sales in August 1982 can be expected to be different than sales in August 1983, because sales on Sundays are different than sales on Wednesdays.

Therefore, the key to accounting for monthly calendar variation in fluid milk sales lies in estimating day-to-day variation during the week. A procedure called the 31-30 Day Difference Method was used to develop a set of daily weights which eliminate most of the variation due to calendar composition. These weights are shown in Table A.

TABLE A--INDEX OF DAILY VARIATION IN WEEKLY IN-AREA SALES

		Index	
Days	Whole Milk Items	Lowfat and Skim Milk Items	Total Fluid Milk Items
Sunday	-0.0764	0.2792	0.0793
Monday	1.3400	1.1628	1.2767
Tuesday	1.2380	1.0671	1.1667
Wednesday	.8840	1.0030	.9250
Thursday	1.0858	1.1624	1.1284
Friday	1.4493	1.1934	1.3318
Saturday	1.0793	1.1321	1.0921

These indexes show how sales on a particular day of the week compare to an average sales day. For example, sales of total fluid milk items on a Sunday are 7.93 percent of an average sales day whereas sales on a Friday are 133.18 percent of an average sales day. Small negative indexes do not disrupt the following calculations.

MONTHLY ADJUSTMENT FACTORS

To derive factors for adjusting monthly data, the sum of the daily weights for each type of month 1/ was divided by the number of days in that month. For example, a 31-day month beginning on a Sunday has a total weight of 30.5091 for lowfat and skim milk items which when divided by 31.0, yields an adjustment factor of 0.9842. The adjustment factors for the other types of months are shown in Table B.

TABLE B--FACTORS FOR ADJUSTING MONTHLY IN-AREA SALES FOR VARIATIONS DUE TO CALENDAR COMPOSITION

Adjustment factors

First Day		Whole milk	: items	:	Lowfat milk			:	Tota milk		uid ems
	:	31-day : months :	30-day months	:	31-day months	:	30-day months	:	31-day months	•	30-day months
Sunday	:	0.9839	0.9754		0.9842		0.9814		0.9846		0.9785
Monday	:	1.0149	1.0193		1.0075		1.0077		1.0119		1.0148
Tuesday	:	1.0067	1.0041		1.0075		1.0023		1.0071		1.0031
Wednesday	:	1.0135	.9990		1.0116		1.0055		1.0124		1.0018
Thursday	:	1.0198	1.0178		1.0157		1.0119		1.0178		1.0153
Friday	:	.9824	1.0176		.9872		1.0108		.9840		1.0141
Saturday	:	.9788	.9668		.9863		.9804		.9822		.9724

The adjustment factor for all 28-day Februarys is 1.0000. The above factors may be applied either to total monthly sales or daily average sales.

These adjustment factors reflect how sales in a particular type of month compare to sales in a month in which all the days are average sales days. For example, since the adjustment factor for a 31-day month beginning on a Sunday for total fluid milk items is 0.9846, sales of these items during such a month are lower than during an average-sales-day month. Therefore, sales during such a month need to be adjusted upward before comparisons to a previous year can be made on a comparable basis. Monthly in-area sales are adjusted to a comparable year-to-year basis by dividing the reported sales by the respective adjustment factor. Table C provides a convenient means of finding the factors applicable to any specific month from 1982-84. Table C is shown on the next page.

A word of caution: The daily weights and the monthly adjustment factors derived from these were based on in-area sales of whole milk items, lowfat and skim milk items, and the total of these in the combined marketing areas. They are intended to apply only to combined market sales data. They may not be the best weights and adjustment factors to apply to individual market data or to individual products.

¹/ The type of month can vary depending on which day the month begins and how many days are in the month.

An explanation of the 31-30 Day Difference Method and an evaluation of the weights obtained are contained in an informal Dairy Division report entitled "Adjusting In-Area Fluid Milk Sales Data for Calendar Composition." You can obtain a copy of this report by writing to the Chief, Market Information Branch, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250.

COMPARING SALES IN DIFFERENT MONTHS

A further application of calendar composition adjustment factors is in comparing in-area sales in different months of the same or different years. To accomplish this, it is necessary to employ seasonal indexes as well as calendar composition adjustment factors. Such indexes based on seasonal patterns of the last 10 years are given in Table D. These seasonal indexes are shown two ways: (1) based on daily average sales, which presents a truer depiction of seasonal variations, and (2) based on total sales, which takes into account the number of days in the month.

TABLE D--SEASONAL INDEXES OF IN-AREA SALES OF WHOLE MILK ITEMS, LOWFAT AND SKIM MILK ITEMS AND THE TOTAL OF THESE, BASED ON DATA FOR 1973 THROUGH 1982

	:	: Whole milk				Lowfat an			:	. Iotal Iluiu		
Month	:-	: items : Daily avg. : Total			:	: milk items : Daily avg. : Total			:	milk items Daily avg.: Total		
	:	sales_	:	sales	:	sales	:	sales	:	sales :	sales

February	:	1.0293		.9477		1.0502		.9671		1.0374	.9553	
March	:	1.0189		1.0386		1.0432		1.0636		1.0285	1.0486	
April	:	1.0042		.9907		1.0263		1.0126		1.0129	.9994	
May	:	.9785		.9975		.9890		1.0083		.9829	1.0020	
June	:	.9348		.9222		.9162		.9040		.9264	.9140	
July	:	.9268		.9448		.8981		.9157		.9145	.9323	
August	:	.9633		.9820		.9340		.9523		.9513	.9698	
September	:	1.0273		1.0134		1.0252		1.0116		1.0273	1.0135	
October	:	1.0407		1.0609		1.0430		1.0635		1.0424	1.0627	
November	:	1.0277		1.0139		1.0290		1.0153		1.0286	1.0148	
December	:	1.0094		1.0290		.9981		1.0177		1.0052	1.0247	

In order to compare sales in two different months of the same or different years, it is necessary to divide the sales figures by the respective seasonal factors and then by the appropriate calendar composition factors. The two adjusted sales figures can then be compared directly and any difference would reflect only the effects of trend and random variation.

For example, how do January 1983 in-area sales of total fluid milk items compare with sales of these items in August 1983? The procedure is as follows:

- (1) For January 1983:
 - a. divide in-area sales by the January seasonal factor 2,956 divided by 1.0629 = 2,781 million pounds
 - b. divide by the January 1983 calendar composition factor 2,781 divided by 0.9822 = 2,831 million pounds
- (2) For August 1983:
 - a. divide in-area sales by the August seasonal factor 2,842 divided by 0.9698 = 2,931 million pounds
 - b. divide by the August 1983 calendar composition factor 2,931 divided by 1.0119 = 2,897 million pounds

Comparing the adjusted sales figures for January 1983, 2,831 million pounds, to the adjusted figure for August 1983, 2,897 million pounds, indicated a 2.3 increase in sales between the two months.

A word of caution: The seasonal indexes, like the monthly adjustment factors, are based on in-area sales for combined markets and may not be the best index to apply to individual market data or to individual products within the groups. Also the procedure for comparing sales is only applicable to sales for the same group of markets.

^{*} Prepared by John Rourke, agricultural marketing specialist, Market Information Branch, Dairy Division, Agricultural Marketing Service. FMOS-285, September 1983 Summary.

SUMMARY OF MAJOR ORDER ACTIONS, SEPTEMBER 1983

Suspensions:

<u>Central Arizona</u> - September 29 (48 FR 44460, 9/29/83). This action continues to suspend for the months of October and November 1983, the 65 percent performance standard for pooling a cooperative association's manufacturing plant that is located in the marketing area.

<u>Eastern Ohio-Western Pennsylvania</u> - September 19 (48 FR 41753, 9/19/83). This suspension reduces the minimum supply plant shipping percentage requirements by 10 percentage points to 30 percent during each of the months of September through November 1983.

<u>Eastern South Dakota</u> - September 1 (48 FR 39606, 9/1/83). This action removes for the months of August 1983 through February 1984, the limits on the amount of milk that a cooperative association or other handler may divert to nonpool plants.

 $\overline{1983}$, this action increases the limits on the amount of milk that may be diverted by a cooperative association or other handlers. During each of these months the limits are raised from 50 percent to 70 percent.

Temporary Revisions:

Chicago Regional - September 20 (48 FR 42964, 9/20/83). This action reduces the minimum supply plant shipping requirements by 10 percentagve points to 15 percent during September 1983, and by 12 percentage points to 18 percent during each of the months of October and November 1983.

 $\overline{\text{November}}$ - September 8 (48 FR 40511, 9/8/83). For each of the months of September through $\overline{\text{November}}$ 1983, the minimum supply plant shipping percentage requirements are lowered 10 percentage points, from 35 percent to 25 percent.

Southwest Plains - September 13 (48 FR 178, 9/13/83). For each of the months of September 1983 through January 1984, the minimum shipping percentage requirements for supply plants are reduced 10 percentage points, from 50 percent to 40 percent.

Amendments:

<u>Great Basin</u> - September 1 (48 FR 34015, 7/27/83). This action provides a Class II classification for formulas prepared for infant feeding or dietary use that are aseptically packaged in hermetically sealed paper containers.

<u>Middle Atlantic</u> - September 1 (48 FR 39033, 8/29/83). The minimum percentage of the milk supply of a cooperative association or federation of cooperative associations that must be delivered to pool distributing plants in order to pool the association's reserve processing plant is reduced from 40 percent to 30 percent.

Oregon-Washington - September 1 (48 FR 156, 8/11/83). The limits on the diversion of milk by a cooperative association or pool plant handler are increased 10 percentage points, from 50 to 60 percent of the total milk they receive from producers each month.

The calculations of a daily base and base milk production for a producer are changed from using days of production represented by the deliveries to using the actual number of days during the particular period.
